

*Maison Pine*  
*A complete architectural transformation*

THE MODERN SPACES

Maison Pine is the result of a thoughtful and ambitious reinvention, led by the homeowner and architect Bruno Gonçalves Pereira. Set within a classic Avenidas Novas building, this duplex has been entirely reimaged to create a home that feels both timeless and deeply contemporary.

This document offers a behind-the-scenes look at the full renovation journey, tracing the evolution of the apartment from its original structure through to its finished form. Through a selection of construction photographs, it reveals the scale of the transformation, from the restoration of the existing spaces to the creation of the entirely new upper floor.

At the heart of the project was the introduction of a sculptural pine staircase and a newly conceived upper level, designed to bring additional volume, light and fluidity to the home. What once was a single-level apartment has been transformed into a beautifully balanced duplex, where original architectural character meets precise contemporary design.

The following pages capture the craftsmanship, structural intervention and architectural vision behind Maison Pine, illustrating how each stage of the renovation contributed to the calm and luminous home it is today.
